2. DETAILS

Listed Significant Trees:

		Public or Private Type:		
Botanical Name Cor	nmon Name Group or	Individual:	Individual	
Corymbia citriodora Lemo	n-Scented Gum		individual.	
Corymbia cilitodora Leitto	Date of A	Date of Assessment/Inspection: 19.11.2015		

Latitude -33.8299044

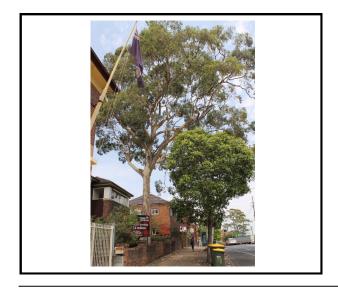

3. STATEMENT OF SIGNIFICANCE

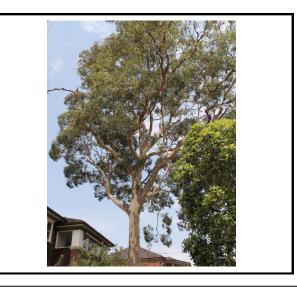

The Corymbia citriodora (Lemon Scented Gum) is regarded as significant in terms of its size and prominent location. The specimen is considered to have landmark qualities and makes an important visual contribution to the urban landscape, particularly in an area with few large trees (aesthetic value).

The Lemon Scented Gum is associated with a specific period of landscape design and is indicative of the Australian native trend that started during the 1950s (*historic value*).

The Corymbia citriodora (Lemon Scented Gum) is considered to have individual significance at a local level in terms of aesthetic and historic value.

7. BACKGROUND

The Corymbia citriodora (Lemon Scented Gum) is located in the front garden area of a block of Art Deco apartments at 7 Pittwater Road, Gladesville.

Corymbia citriodora (Lemon Scented Gum) is a tree growing to 35 metres in height, from north-eastern Australia. Despite its limited natural distribution, the attractive form and scented foliage of this species has made it popular for use in large parks and gardens throughout Australia.

Native trees gained popularity during the 1940s to 1950s as gardeners began to embrace a new Australian garden style being promoted by local designers including Betty Maloney and Edna Walling. The new approach became part of a wider focus on environmental issues during the 1960s to 1970s. Since this time, numerous Eucalyptus and Corymbia species have combined with other Australian natives, to create a new aesthetic layer in Hunters Hill.

The current size of the Lemon Scented Gum suggests a planting date from the 1960s to 1970s.

The Lemon Scented Gum is regarded as significant in terms of its size and prominent location. The specimen is considered an important landmark tree, close to the junctions of Pittwater and Victoria Roads. The Lemon Scented Gum makes an important visual contribution to the urban landscape, particularly in an area with few large trees.
