Proposed changes	Agree/ Disagree	Your comment
<p><u>PLAN 1 REFUGE ISLAND AT CROWN ST AND SHERWIN ST.</u></p> <p>Notes: Centre island 2m wide will provide 2 stage crossing when required due to limited sight distance due to the crest in Crown. Parking restrictions are required on the south side of Sherwin Street opposite Crown Street to facilitate turning movements. There will be a loss of 2 parking spaces.</p>		
<p><u>PLAN 2 SINGLE LANE ANGLED SLOW POINT CROWN ST AND KELLY (SOUTH SIDE)</u></p> <p>Notes: 1 lane angled slow point located south of Kelly Street on Crown Street. A vehicle must give way to an opposing vehicle. Vehicle traffic is slowed due the angle and the need to 'give way' to a vehicle. Location of the device at the intersection makes use of the statutory 10m 'No Stopping' so there is no loss of legal parking.</p>
